Work Experience

State and liberty

AI Automation Lead

April 2026 – Present

- Led company transition to **AI-assisted development**, accelerating **delivery velocity ~10×**.
- **Lead the automation** team across supply chain, store operations, and analytics.
- Drove GCP cost optimization across BigQuery, Dataplex, and Cloud Run, delivering **\$100K+ in annual savings**.
- Designed custom **MCP tools** integrating internal data systems with Claude for natural-language operations.
- Architected and deployed **n8n workflow** automations on Google Cloud Run.
- Configured **GCP load balancing with IAP**, path-based routing, and Certificate Manager across prod and dev.
- Built **cloud infrastructure** and CI/CD pipelines standardizing application deployment.
- Partnered with operations to translate business requirements into production **automation** specs end-to-end.

Full-stack developer

June 2024 – April 2026

- Developed internal web applications using **Retool** to streamline business operations.
- **Automated** business tasks and data updates using **Workflows**, reducing manual workload.
- Managed and optimized data in **BigQuery** and **PostgreSQL**.
- **Optimized database queries and web pages**, improving load time from **1 minute to 5 seconds**.
- Designed and built **automated HTML/CSS email templates**.
- Developed backend APIs using **Node.js** and **Express**, and deployed them on **Google Cloud Platform (GCP)**.
- **Automated** processes using **Selenium** and deployed solutions on **Google Cloud Run Functions**.
- Developed custom components in **React.js** for tailored UI functionality.
- **Built mobile applications** for internal use, improving accessibility and productivity.
- Integrated **Google Cloud Storage** for secure internal file management.
- **Reviewed code** to ensure quality, maintainability, and adherence to coding standards.
- **Mentored team members**, providing guidance and support to help them effectively solve complex problems.

Freelance Developer

October 2023 – June 2024

- Contributed to the development of a serverless application built with **Astro** and **TypeScript**, generating cryptocurrency chart videos programmatically using **Remotion**.
- Developed a serverless application using **Next.js**, integrating multiple APIs to capture leads via forms and store them in a **MySQL** database.
- Designed user interfaces and user experiences (UI/UX) using **Figma**, ensuring intuitive and visually appealing layouts.
- **Automate** various business tasks using **Google Apps Script**, improving efficiency and reducing manual workload.

Volatility Box – Full-stack Developer

August 2022 – October 2023

- Developed front-end interfaces using **WordPress**, **HTML**, **CSS**, and **Tailwind CSS**.
- Built back-end services with **Express.js** for robust and scalable application logic.
- Integrated **Socket.IO** to deliver real-time data updates on the customer dashboard.
- Deployed both front-end and back-end applications to a **Linux server** for production use.
- Designed an algorithm to identify potential profitable trades, enhancing decision-making capabilities.
- **Reviewed code** to ensure quality, maintainability, and adherence to coding standards.
- Conducted **performance optimization** and system testing to improve overall efficiency and reliability.

Cropital – Full-stack Developer

July 2022 – August 2023

- Maintained and developed new features for a crowdfunding platform using **Sails.js** and **Vue.js**.
- Maintained and enhanced features for an internal application built with **Python** and **Django**.
- Deployed applications on **Linux servers** using **AWS** and **DigitalOcean** for scalable hosting.
- Developed new features for an e-commerce site built on **WordPress**, improving functionality and user experience.

Skills

AI Tools: Claude Code, Claude Design, Gemini, Codex, MCP Server
Programming Languages: JavaScript, TypeScript, PHP, Python
Databases: MySQL, PostgreSQL, BigQuery
Frameworks & Libraries: Node.js, Express.js, React.js, Next.js, CodeIgniter, Sails.js, WordPress, Retool
Cloud Platforms & Hosting: Google Cloud Platform (GCP), AWS, DigitalOcean, Vercel
Web Design & Styling: HTML, CSS, LESS, Tailwind CSS, Bootstrap
Version Control: Git, GitHub
Creative Tools: Adobe XD, Figma, Adobe Illustrator, Adobe Photoshop, Adobe Premiere Pro
Automation & Scripting: Selenium.js, Google Apps Script

Education

BS Information Technology
Quezon City University | 2018 – 2022

Certification

Google Professional Cloud Architect
Ongoing

Claude Certified Architect
Ongoing
